Special Programs
Administration**

400 Seventh St., S.W.
Washington, D.C. 20590

JAN 17 2001

DOT-E 10840
(THIRD REVISION)

EXPIRATION DATE: December 31, 2002

(FOR RENEWAL, SEE 49 CFR § 107.109)

1. GRANTEE: Kuehne Chemical Company, Inc.
South Kearny, NJ
2. PURPOSE AND LIMITATIONS:
 - a. This exemption authorizes the manufacture, mark, sale and use of a non-DOT specification full opening head, steel salvage cylinder for overpacking damaged or leaking sulfur dioxide cylinders. This exemption provides no relief from the Hazardous Materials Regulation (HMR) other than as specifically stated herein.
 - b. The safety analyses performed in development of this exemption only considered the hazards and risks associated with transportation in commerce.
3. REGULATORY SYSTEM AFFECTED: 49 CFR Parts 106, 107 and 171- 180.
4. REGULATIONS FROM WHICH EXEMPTED: 49 CFR § 173.34(d) and § 173.304(a)(2) in that a non-DOT specification cylinder is authorized.
5. BASIS: This exemption is based on the application of Kuehne Chemical Company dated November 11, 2000, submitted in accordance with § 107.109.

6. HAZARDOUS MATERIALS (49 CFR § 172.101):

Proper Shipping Name/ Hazardous Material Description	Hazard Class/ Division	Identi- fication Number	Packing Group
Sulfur dioxide	2.3	UN1079	N/A

7. SAFETY CONTROL MEASURES:

a. PACKAGING - Packaging prescribed is a non-DOT specification full opening head, steel salvage cylinder of welded construction, with provisions for securely positioning the damaged cylinder contained within. The salvage cylinder must conform with the Chlorine Institute's drawing 188 dated March 19, 1987, on file with the Office of Hazardous Materials Exemptions and Approvals (OHMEA) except that an o-ring constructed of EPDM is used. The salvage cylinder must be designed, constructed and stamped in accordance with Section VIII of the ASME Code for a working pressure of 250 psig at 300°F and as follows:

Volume.....31 gallon water
capacity
(nominal).

Material.....ASTM A 283, A 53
Gr. B,
or equivalent carbon
steel.

Outside diameter.....12 inches, nominal.

Length.....64 inches, nominal.

Sidewall thickness.....0.250 inch, nominal
(.230 inch, min.)

Design Service pressure (MAWP).....250 psig at 70°F

Test pressure.....375 psig.

Openings - Sidewall.....3/4 inch threaded
outlet inside a
valve protective
cap.

Openings - head.....Full opening head,
hinged to cylinder
sidewall.

JAN 17 2001

Continuation of DOT-E 10840 (3rd Rev.)

Page 3

Pressure relief devices.....None.
Welded attachments.....2-lifting rails
2-supports

b. TESTING - Each salvage cylinder must be cleaned and purged after each use and must be visually inspected (internally and externally) and hydrostatically retested once every 2 years at a test pressure of at least 375 psig. The visual inspections must be performed in accordance with the Compressed Gas Association's Pamphlet C-6. The retest and inspection must be made by an employee that is familiar with the salvage cylinder and is trained and experienced in the use of the inspection and testing equipment. Records of retest must be made available to a DOT representative upon request.

c. OPERATIONAL CONTROLS -

(1) Drivers and other persons who load/unload or transport these salvage cylinders must be trained in the handling and proper use of the cylinder. The loaded salvage cylinder must be delivered to the consignor or consignee as soon as practicable.

(2) Salvage cylinders are authorized for overpacking leaking 100 and 150 pound water capacity 3A480X or 3AA480X sulfur dioxide cylinders.

(3) Each salvage cylinder must be plainly and durably marked on the cylinder sidewall, 180 degrees apart, in letters at least 2 inches high on a contrasting background, "DOT-E10840" and "SALVAGE CYLINDER".

(4) Each salvage cylinder must bear the appropriate hazard class labels as prescribed for sulfur dioxide.

8. SPECIAL PROVISIONS:

a. In accordance with the provisions of Paragraph (b) of § 173.22a, persons may use the packaging authorized by this exemption for the transportation of the hazardous materials specified in paragraph 6, only in conformance with the terms of this exemption.

b. A person who is not a holder of this exemption, but receives a package covered by this exemption, may reoffer it for transportation provided no modifications or

Page 4

changes are made to the package and it is offered for transportation in conformance with this exemption and the HMR.

c. A current copy of this exemption must be maintained at each facility where the package is offered or reoffered for transportation.

d. Each packaging manufactured under the authority of this exemption must be marked with a registration symbol designated by the Office of Hazardous Materials Exemptions and Approvals for a specific manufacturing facility.

e. A current copy of this exemption must be maintained at each facility where the package is manufactured under this exemption. It must be made available to a DOT representative upon request.

9. MODES OF TRANSPORTATION AUTHORIZED: Motor vehicle.

10. MODAL REQUIREMENTS:

a. A current copy of this exemption must be carried aboard each motor vehicle used to transport packages covered by this exemption.

b. Each salvage cylinder must be secured to the motor vehicle by a securement system that conforms with the requirements contained in §§ 393.100 through 393.106.

11. COMPLIANCE: Failure by a person to comply with any of the following may result in suspension or revocation of this exemption and penalties prescribed by the Federal hazardous materials transportation law, 49 U.S.C. 5101 et seq:

- o All terms and conditions prescribed in this exemption and the Hazardous Materials Regulations, Parts 171-180.
- o Registration required by § 107.601 et seq., when applicable.

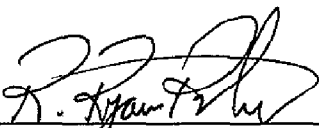

Each "Hazmat employee", as defined in § 171.8, who performs a function subject to this exemption must

receive training on the requirements and conditions of this exemption in addition to the training required by §§ 172.700 through 172.704.

No person may use or apply this exemption, including display of its number, when this exemption has expired or is otherwise no longer in effect.

12. REPORTING REQUIREMENTS: The carrier is required to report any incident involving loss of packaging contents or packaging failure to the Associate Administrator for Hazardous Materials Safety (AAHMS) as soon as practicable. (Sections 171.15 and 171.16 apply to any activity undertaken under the authority of this exemption.) In addition, the holder(s) of this exemption must also inform the AAHMS, in writing, as soon as practicable of any incidents involving the package and shipments made under this exemption.
